FACTORES DE RIESGO Y PROTECCIÓN EN RELACIÓN AL JUEGO PATOLÓGICO EN POBLACIÓN ADULTA: UNA REVISIÓN DE LA LITERATURA

Fernandez, Maria; Portela, Mayda

Universidad Católica del Uruguay. Montevideo, Uruguay.

RESUMEN

Introducción: El juego patológico se entiende como un patrón recurrente y persistente de juego con consecuencias de afectación funcional y malestar significativo: impactando en la salud mental y el bienestar de las personas. **Objetivos:** Analizar la evidencia científica actualizada respecto a la vinculación entre el juego patológico, los factores psicopatológicos asociados y su incidencia en el bienestar psicológico de personas adultas. **Método:** Se realizó una revisión sistemática de la literatura en revistas científicas arbitradas e indexadas en el periodo entre enero de 2019 y febrero de 2022. **Resultados y Conclusiones:** Siguiendo los criterios de inclusión y exclusión y limitando sesgos, se sistematizaron un total de 20 estudios científicos empíricos, revisiones sistemáticas, estudios de metaanálisis y teóricos que abordan los temas de validación instrumental, comorbilidad entre juego patológico y sintomatología clínica, modelos teóricos sobre trastorno del juego y modificaciones en los criterios diagnósticos.

Palabras clave

Revisión sistemática - Juego patológico - Psicopatología - Bienestar psicológico

ABSTRACT

RISK AND PROTECTION FACTORS IN RELATION TO PATHOLOGICAL GAMBLING IN ADULT POPULATION: A REVIEW OF THE LITERATURE
Introduction: Pathological gambling is understood as a recurrent and persistent pattern of gambling with consequences of functional impairment and significant discomfort: impacting people's mental health and well-being. **Objectives:** Analyze the updated scientific evidence regarding the link between pathological gambling, the associated psychopathological factors and their impact on the psychological well-being of adults. **Method:** A systematic review of the literature was carried out in refereed and indicated scientific journals in the period between January 2019 and February 2022. **Results and Conclusions:** Following the inclusion and exclusion criteria and limiting biases, a total of 20 systematically reviewed empirical scientific studies, meta-analysis and theoretical studies that address the issues of instrumental validation, comorbidity between pathological gambling and clinical symptoms were systematized. **Models. Theorists about gaming disorder and modifications in diagnostic criteria.**

Keywords

Systematic review - Pathological gambling - Psychopathology - Psychological well-being
